“

O•DNAscan saved my father's life.
*I am thankful to our doctor and
British Columbia Cancer Agency.*

Laxmi P.

I was struggling with a sore on my tongue for several weeks. I wasn't concerned as it was not painful but it wasn't going away.

I showed it to my daughter, and she got really worried.

We went to our dentist and he recommended a comprehensive

My Story

oral examination. My sore looked suspicious and the doctor advised me **O·DNA**scan.

I was shocked when early signs of oral cancer were detected.

My life changed that day.

With God's grace my condition was detected in pre-cancer stage and doctor was able to treat me in one day.

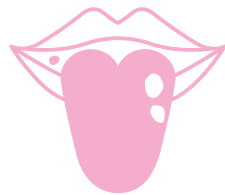

Had I not done a comprehensive oral examination, who knows, if I would be alive to tell my story today.

“When detected late only 1 in 3 live to tell such a story. I urge all my family and friends get screened. Early detection saved my life”

Arjun B.

ORAL CANCER IS A DEADLY KILLER

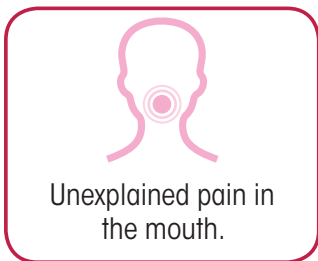

Late Detection Results in Two out of Three to Die from Oral Cancer

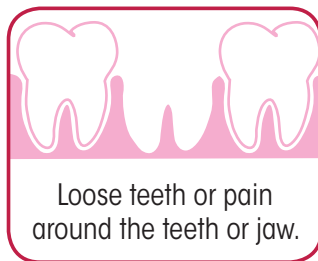

Ulcers, sores, white/red patches that do not heal.

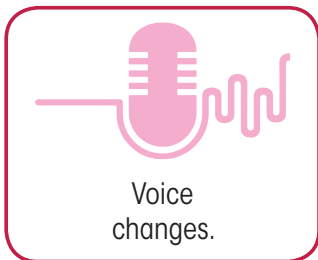

Swollen gums.

Unexplained pain in the mouth.

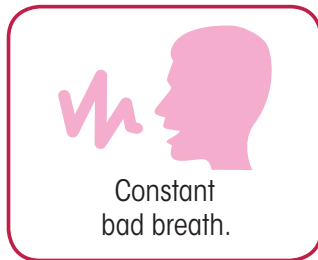

Loose teeth or pain around the teeth or jaw.

Voice changes.

Difficulty to swallow.

Constant bad breath.

The Good News

Routine screening can prevent oral cancer

NO CUT
NO SYRINGE
NO PAIN
Soft brush sampling

Early detection can save your life

SOFT BRUSH TEST CAN SAVE YOUR LIFE

O·DNAscan is the world's most advanced and accurate early cancer detection test which can detect potential cancer **3-5 years before any symptoms.**
